

Computer-Based Sample Test Scoring Guide Grade 4 Math AzMERIT

Updated January 24, 2017

Prepared by the Arizona Department of Education and the American Institutes for Research®

About the Sample Test Scoring Guide

The AzMERIT Sample Test Scoring Guides provide details about the items, student response types, correct responses, and related scoring considerations for AzMERIT Sample Test items.

Within this guide, each item is presented with the following information:

- Item number
- Domain
- Cluster
- Content Standard
- Math Practices
- Depth of Knowledge (DOK)
- Static presentation of the item
- Static presentation of student response field (when appropriate)
- Answer key, rubric or exemplar
- Applicable score point(s) for each item

The items included in this guide are representative of the kinds of items that students can expect to experience when taking the computer-based test for AzMERIT Grade 4 Math.

Two models are shown. Each model has been shaded gray to represent a fraction.

Which statement is true about the fractions $\frac{3}{4}$ and $\frac{5}{6}$?

- (A) They are equivalent because each model is divided into equal parts.
- (B) They are not equivalent because the number of shaded parts in each model is different.
- (C) They are equivalent because the size of the areas shaded gray in both models is the same.
- (D) They are not equivalent because the models are divided into different numbers of equal parts.

What is the product of 4 and 2956?

11824

The image shows a digital math input interface. At the top, there is a text input field containing the number "11824". Below this field is a toolbar with five icons: a left arrow, a right arrow, a left arrow with a curved tail, a right arrow with a curved tail, and a square with an 'X' (clear). Below the toolbar is a grid of buttons for numbers and symbols. The grid is organized as follows:

1	2	3
4	5	6
7	8	9
0	.	$\frac{\square}{\square}$

(1 point) Student 11824 or any equivalent value.

Kalli's family is planning a sandbox for their backyard.

The sandbox must have

- a rectangular shape.
- a length of 8 feet.
- a perimeter greater than 20 and less than 30 feet.

Use the Connect Line tool to draw a possible plan for the sandbox.

(1 point) Student created a correct rectangle with a length of 8 feet and a perimeter between 20 and 30 feet.
